

# Yr 10 Science P3: Radioactive Materials

## Words to find:

air, around, artificial, background, big, cancer, contamination, dose, drink, electricity, emitted, exposed, irradiation, nuclear, radiation, rocks, sources, sources, stations, universe, x rays.

## Use the words you find to complete this passage:

\_\_\_\_\_ Radiation is that left over from the \_\_\_\_\_ Bang - when the \_\_\_\_\_ began. It is all \_\_\_\_\_ us and is \_\_\_\_\_ by many \_\_\_\_\_ from the buildings and \_\_\_\_\_ around us, to the \_\_\_\_\_ we breathe, to the food and \_\_\_\_\_ we need. There are also lots of \_\_\_\_\_ sources (manmade) from the radiation used to give us \_\_\_\_\_ and treat \_\_\_\_\_ tumours to the \_\_\_\_\_ used in \_\_\_\_\_ power \_\_\_\_\_ to produce \_\_\_\_\_. These \_\_\_\_\_ increase the amount of radiation we are \_\_\_\_\_ to and increase our \_\_\_\_\_ each year by \_\_\_\_\_ and \_\_\_\_\_.
